

## Problem 1 – Mountain Rooms

Create a Web page (HTML5 + CSS3 + images) that looks and behaves like the screenshots below:

### PICK A ROOM THAT BEST SUITS YOUR TASTE AND BUDGET

**DELUXE ROOM**

18 m2 • Balcony • Mountain view

**\$200.0** / Night

**SUPERIOR ROOM**

18 m2 • Balcony • Mountain view

**\$180.0** / Night

**STANDARD ROOM**

18 m2 • Balcony • Mountain view

**\$120.0** / Night

### Input

You are given the above screenshots + all required images + the texts on the site.

### Output

The output should be valid HTML5 + CSS3 + images that implement the above Web page.

### Constraints

- Use google font **Lato** - <https://fonts.googleapis.com/css?family=Lato>
- Use google font **Montserrat** - <https://fonts.googleapis.com/css?family=Montserrat>
- The site should open correctly in the latest version of Chrome
- Pixel-perfect implementation is not required.
