

Problem 3 – Mountain Form

Create a Web page (HTML5 + CSS3 + images) that looks and behaves like the screenshots below:

The screenshot shows a web form titled "Mountain Form" with a green underline. The form is set against a light blue background. It contains four input fields, each with a red asterisk indicating a required field. The first field is for "Name" with a person icon and the value "Andrew". The second is for "Email" with an envelope icon and the value "andrew@email.com". The third is for "Phone number" with a mobile phone icon and the value "123 456 789". The fourth is for "Password (minimum 6 characters)" with a lock icon and masked characters "*****". A green "Sign up" button is located at the bottom right of the form.

Input

You are given the above screenshots + all required images + the texts on the site.

Output

The output should be valid HTML5 + CSS3 + images that implement the above Web page.

Constraints

- Use google font **Francois One** - <https://fonts.googleapis.com/css?family=Francois+One>
- Use google font **Source Sans Pro** - <https://fonts.googleapis.com/css?family=Source+Sans+Pro:300>
- Use Font Awesome - <https://maxcdn.bootstrapcdn.com/font-awesome/4.7.0/css/font-awesome.min.css>
- The site should open correctly in the latest version of Chrome
- Pixel-perfect implementation is not required.
